

WEITACK® SBS

H100

Properties:

SBS H100 is a copolymer which made from butadiene and styrene, white solid, it's hardness come from PS and elasticity come from butadiene, it owns advantages of both rubber and plastics, has excellent low and high temperature endurance, breathability and excellent elasticity, can be used well together with SEBS,SIS....., widely used in modification of road asphalt, shoes, adhesive....

Ratio of Styrene/Butadiene %: 33 / 67

Specification:

Type:		H100
Volatile	%	1.0
Shore hardness; A,	min	85
300% Modulus	min	3.5
Tensile strength	Mpa	25
Elongation rate	%	710
permanent set	%	55
MFR	g/10min	0.01- 5.0

Application

SBS H100 used in Adhesives, Shoes.,

Package:

15g/20kg Kraft bags

Storage:

Store it in ventilation place
