

Liquid Terpene Resin

Properties:

Liquid Terpene Resin TL630, It is a transparent, light-colored, low molecular weight liquid resin, Soluble in benzene, toluene, turpentine, solvent gasoline, etc., insoluble in water, methanol and ethanol

Detailed Specification:

Specifications	TL630
Softening point, global method °C	23-32
Color (Gardner 1:1)	6 max
Acid value KOHmg/g	1 max
Toluene intolerance, %	0.1 max
Viscosity 35°C mPa.s	30000-40000

Applications:

The resin is suitable for the formulation of EVA, SIS, SBS hot melt adhesives and other adhesives with good initial tack, high cold resistance and soft performance.

Package: Packed in iron drum, net weight 180kg/drum or 200kg/drum.

Storage: This product is a non-hazardous chemical and is recommended to be stored indoors at 30°C or below.
